

## Venue information

af Auditorium Friedrichstraße im Quartier I 10  
Friedrichstraße 180  
10117 Berlin  
Germany

**Explore** the latest developments in Smart Medical Devices and how the combination of technology and biotechnology can achieve relevant results and, ultimately, clinical impact.

**Engage** with top speakers from academia and industry, among them:

- Jill Helms, Stanford University (US)
- Andrew Carr, Oxford University (UK)
- Elke Lieb, Heraeus Holding GmbH (DE)
- Abhay Pandit, NUI Galway (IE)
- Viola Vogel, ETH Zürich (CH)
- Thomas Grupp, Aesculap AG (DE)

**Join** us in the heart of Berlin on Thursday,  
18 October 2018 for a stimulating conference.

**Register for free!**  
Please, visit our website to register.

## RegMed Forum 2018 – Smart Medical Devices

18 October 2018 | Berlin

**Register now!**

# Welcome

In regenerative medicine, new therapy options include Smart Medical Devices that combine advanced technology with biotechnology. Such Smart Medical Devices are used increasingly, be it 3D-printed biomaterials for cartilage or tissue replacement or intelligent implants with integrated biosensors. At this year's RegMed Forum international experts from industry and academia will discuss the use, the conditions for approval and the future applications of these products.

The Berlin-Brandenburg Center for Regenerative Therapies (BCRT) and HealthCapital Berlin-Brandenburg are jointly organising the 5th annual RegMed Forum 2018 on Thursday, 18 October 2018 in Berlin, Germany. This year, the international conference focusses on current and future trends in the development of Smart Medical Devices and how those devices will improve treatment options.

Together, stakeholders from industry and academia will explore the following topics: Biologised Medical Devices, Intelligent Implants and Medical Device Regulation.

Registration is now open and participation is free of charge. For more information on speakers, industry exhibitors and registration, please visit our website:

# Agenda

8:30am Registration		
9am	Biologised Medical Devices	Industry Exhibition
11.40am	Intelligent Implants I	
1.20pm	Industry Pitches	
2.50pm	Intelligent Implants II	
3.30pm	Panel: Medical Devices Regulation	
4.45pm Get Together		

Top speakers from academia and industry include:

Jill Helms, Stanford University (US)  
Andrew Carr, Oxford University (UK)  
Elke Lieb, Heraeus Holding GmbH (DE)  
Abhay Pandit, NUI Galway (IE)  
Viola Vogel, ETH Zürich (CH)  
Thomas Grupp, Aesculap AG (DE)

# About the Organisers

**HealthCapital**  
BERLIN BRANDENBURG

The German capital region is one of the leading life sciences and healthcare industries centers in the world. The HealthCapital cluster management drives networking and technology transfer in the region and supports international companies interested in relocating to the German capital region. Berlin Partner für Wirtschaft und Technologie GmbH and Wirtschaftsförderung Land Brandenburg GmbH are responsible for managing the cluster.

Berlin-Brandenburg Center  
for Regenerative Therapies **BCRT**

The Berlin-Brandenburg Center for Regenerative Therapies (BCRT) has the central aim of investigating endogenous regeneration mechanisms of the human body and to translate these findings from the laboratory bench into clinical practice. The BCRT is jointly operated by the Charité – Universitätsmedizin Berlin and the Helmholtz-Zentrum Geesthacht.

Partners & Sponsors

Funded by the federal state of Berlin, the federal state of Brandenburg and the Investitionsbank Berlin, co-funded by the European Union (European Fund for Regional Development).
